PERENNIAL CHAMPIONSHIP CONTENDER

K-PAX Racing is one of the most successful GT race teams in recent U.S. history. Established in 2007, K-PAX Racing owns more than 60 wins and 170 podiums in the GT World Challenge America Championship – one of the most competitive sports car racing series in North America. Since its formation, K-PAX Racing has won several championships with Porsche, Volvo, McLaren, Bentley and Lamborghini. K-PAX Racing partnered with Lamborghini Squadra Corse in 2021, fielding a multi-car Huracán GT3 EVO program that swept the series championship. The team will return with Lamborghini for 2022, poised to defend its titles stateside while returning to the historic TotalEnergies 24 Hours of Spa.

JIM HAUGHEY, TEAM OWNER

Jim Haughey, a Sunnyvale, Calif. native, worked in the automotive industry for 25 years as the former owner of Scandia Auto before shifting his focus from a fan of racing to becoming a team owner in Fall 2006.

Haughey – a dreamer and a doer – dared to be different, which has been the center pillar of the team's longstanding team legacy, and one highlighted by four championship titles.

Haughey sought to blend his past with the present in 2009. Scandia Auto Service was a full-service independent Volvo specialist repair shop, and he had a desire to bring his two automotive interests together. He partnered with Volvo North America as the team made the change to the 2.5-liter, turbocharged Volvo S60 AWDs which were title-bound the following season. K-PAX Racing also won the 2016 Driver's and Manufacturer's Championship with the McLaren 650S GT3, which were the only of its kind competing in North America.

In three years of partnership with Bentley, K-PAX Racing fostered great success – back-to-back Team Championships (2018-2019). K-PAX Racing was the only team in North America that fielded the second-generation Bentley Continental GT3, helping the manufacturer to new milestones with its blue-ribbon machine.

Haughey and his team found instant success with its shift to Lamborghini in 2021, sweeping the championship in all three categories. This included a Drivers' and Team Championship, as well as helping the manufacturer to its most recent North American title.
